Promoting Education for sustainable development in Saskatchewan and around the world

- Part of the GlobalRCENetwork
- “facilitate learning towards sustainable development in local and regional communities”
- Connecting together “multi-sectoral and interdisciplinary members who might not usually work together.”
- A space to search for expertise , not only via having people invite RCE into their communities but in the community there is expertise sharing between members

Promoting Education for sustainable development in Saskatchewan and around the world

- Show the momentum and want for Sustainable Development Display the sustainable development projects and research going on in Saskatchewan (both flagship projects reported to the GlobalRCENetwork and those locally recognized by the RCE)
- The goal of the community is not only education, but it is also about growth of the community to have a bigger experience pool in which to grow and nurture.
- Events and Activities:
 - Annual Recognition event
 - Monthly Virtual Meetings
 - Workshops

Community consists of

- Main website (Wordpress)
- Parent Website not hosted by community but larger global RCE Network
- Zoom
- Email (Gmail)
- Facebook
- Twitter
- Youtube
- Word processors , and spreadsheet programs , no community standard of which used

Project Sustainability Goal

Goal 17: Partnerships for the goals.

This is one of the goals for the community

Any assistance to this community will be contributing to this goal

Growth of the community depends on good first impression to new potential members.

City of Saskatoon

[Business Recycling Regulation and Education Program](#)

The City of Saskatoon developed the first bylaw in Saskatchewan requiring businesses and organizations to divert recyclables and organics. Educational resources and ongoing support are available to aid in the sector's diversion efforts. The program will help achieve the city's waste diversion towards 70% from the Saskatoon Regional Waste Management Centre (Landfill).

City of Saskatoon

[Saskatoon Home Energy Loan Program](#)

The Home Energy Loan Program, Residential Solar Potential Map, Energy Coaches and Reno Resources webpage educate and incentivize residents to reduce energy use in their homes by retrofitting their current homes and adding renewable sources of energy.

Most interaction is in a list with no instructions on how to accomplish them

1. **Attend** a monthly virtual meeting (every third Thursday, 3:30 – 4:30 pm) to connect with others, ask questions and learn how the RCE network can help you, and how you can contribute.
2. **Invite** RCE Saskatchewan network to bring advice or expertise to your organization or community.
3. **Attend** our annual Recognition Event and sustainability workshop.
4. **Apply** to receive recognition from RCE Saskatchewan for your sustainable development initiative at our annual Recognition Event.
5. **Sponsor** our annual Recognition Event to help us support and recognize Saskatchewan's leaders in education for sustainable development.
6. **Volunteer** to help with RCE research, communications, events, projects, and welcoming visitors from other RCEs. We welcome ideas and support from students, faculty, teachers and organization and community leaders. Please contact us!
7. **Sign up** to receive RCE Saskatchewan email updates.
8. **Subscribe** to our [twitter feed](#).
9. **Follow us** on [Facebook](#).
10. Become a **formal partner** of RCE Saskatchewan.
11. **Connect** with [RCEs of the Americas](#) to learn from others working on similar issues.
12. **Email** RCE Sask co-coordinators Roger Petry (PH: 306.585.5295 or roger.petry@uregina.ca) or Margret Asmuss (306.654.2075 or msasmuss@sasktel.net) to tell them what you are working on and what help you might need.

Some interaction may cause bottlenecks as membership grows Ex. recognition award duplicate applications

2015 Awards at the University of Saskatchewan

Formal Education includes school systems from kindergarten to the end of high school, as well as technical institutes, colleges, and universities.

Non-formal Education includes education, training, and public awareness that occurs through organizations outside the formal school system, such as businesses and community-based organizations.

Informal Education includes educational activities aimed at the general public and includes public and social media such as news and film, as well as events and campaigns.

The deadline to submit your application for the 2023 ESD Recognition Awards is March 31, 2023. After checking out the **Application Guide** (below), you have three options for applying:

1. Download the form below, fill it out, save it and then send it to rsask_event@gmail.com; or
2. Apply on line at 2023 ESD Recognition Application at the bottom of this page; or
3. If neither are suitable for you, contact the Event Coordinator at rsask_event@gmail.com before March 15 to arrange another option for submitting your application.

Apply On-line

Adjudicators will look for clear descriptions of:

- The "where, why, what, when and how" of your project.
- The Education for Sustainable Development component(s) of your project.
- How your project supports Sustainable Development and one or more of the United Nations' 17 Sustainable Development Goals.
- The accomplishments and relevance(s) that your project achieved by March 31, 2023.
- How your project may contribute to ongoing momentum toward sustainability.

Questions marked with an asterisk are required; others should be answered if applicable to your project.
Please contact the Event Coordinator at rsask_event@gmail.com if you wish to submit supporting documentation.

Name of Project *

Was this project pursued by an individual, a group of individuals or an organization? *

Applicant Name (Individual or Organization): *

Additional Project Visios

- Provide task documentation so volunteers can utalize the new functionalities better.

Target Audience

Visitors to the web site, We want to support building and growing the knowledge the community, so a good first impression is needed.

Constraints

- Wordpress
- Free plugins
- Build the Project out of pre-existing , and well supported tools to give the community resources if the system starts to break down the community has means and people to help fix functionality (some wordpress updates have been known to break plug ins , well supported ones are fixed faster)
